Summary

AI-first Full Stack (MERN) Web Developer with hands-on experience building production-ready web applications using React.js, Node.js, Express.js, MongoDB and TypeScript. Integrates AI tools and APIs (Gemini, Claude, Cursor) throughout the development lifecycle — from rapid prototyping to shipping AI-powered features — with strong expertise in RESTful API design and scalable backend architecture.

Skills

Frontend: JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Responsive Design, Motion, Figma
Backend: Node.js, Express.js, MongoDB, PostgreSQL, RESTful APIs, Authentication, FastAPI, Socket.io
AI & Automation: AI Agents, Google ADK, Gemini API, Claude API, MCP (Model Context Protocol), LLM Integration, Prompt Engineering
Tools : Git & GitHub, Netlify, Vercel, Render, VS Code, Antigravity, Cursor, Claude
Soft Skills: Team Leadership, Cross-functional Collaboration, Public Speaking, Problem Solving, Technical Communication, Time Management, Adaptability

Projects

Wagr.io – AI-Powered Prediction Exchange GitHub

- **Tech Stack:** React.js · TypeScript · Node.js · Express.js · MongoDB · Groq API
- Built a full-stack fintech prediction-market platform (Polymarket-style) on the MERN stack, letting users forecast real-world events and trade contracts with a virtual currency, backed by real-time Socket.io broadcasts.
- Engineered a peer-to-peer liquidity-pool probability engine that dynamically recomputes YES/NO odds in real time as trader wagers shift market pools.
- Designed an AI engine for automated event discovery, draft market-proposal generation, duplicate detection, and content-safety moderation using the Groq API.
- Built an AI-summarized news hub linking live headlines to markets with probability-impact analysis, plus JWT auth, gamified achievements, leaderboards, and a social forum.

Fincept – AI Investment Portfolio Platform Live GitHub

- **Tech Stack:** React.js · TypeScript · FastAPI · MongoDB · Gemini API · Angel One Smart API · MFAPI.in · Vercel
- Built a full-stack AI-driven investment portfolio management platform aggregating data from Indian retail brokers (Zerodha, Groww, Angel One) via Smart API integration.
- Engineered a real-time news impact analysis engine and geopolitical/commodity radar using Gemini API, surfacing portfolio risk signals across 10+ data dimensions.
- Designed a zero-cost MVP architecture using Angel One Smart API, MFAPI.in, Gemini API, and Vercel, achieving production deployment with no infrastructure cost.

Document Lifecycle Management Agent Live GitHub

- **Tech Stack:** React · FastAPI · PostgreSQL · AWS Textract · Camunda 8 · Alembic
- Architected JWT-based RBAC using FastAPI and PostgreSQL across 4 user roles with Alembic-managed migrations, securing access for 100+ document types.
- Built an OCR pipeline with AWS Textract achieving 92% extraction accuracy, auto-scoring confidence levels and reducing manual review time by 50%.
- Orchestrated the full document lifecycle (ingestion → review → approval → archival) via BPMN 2.0 on Camunda 8 with SLA tracking across 500+ documents per cycle.

Certifications

- **Model Context Protocol – Anthropic (2024):** MCP bridges the gap between static AI models and live data/tools — giving them secure, standardized access to real-world systems without custom integrations.
- **Claude 101 – Anthropic (2024):** Covers core Claude features, prompt engineering essentials, and practical AI integration for production workflows.

Education

B.E. Artificial Intelligence and Data Science **Graduated: 2026**
ISBM College of Engineering, Pune *CGPA: 8.23 / 10*
